Not Applicable

Explain the problem statement in one line(Maximum25-35 words) *

Existing government project monitoring systems in India lack citizen engagement and comprehensive oversight, hindering transparency and accountability.

Please give us a detailed background of the problem *

India has made commendable strides in implementing systems to monitor government projects, such as the central OCMS platform and state-level initiatives. These systems offer valuable functionalities, like progress reporting and financial management tools (PFMS). However, there's room for improvement to create a more comprehensive and

Please explain who is affected by the problem(Maximum 100 words) *

Project Contractors: Difficulty in transparent expense management and communication with authorities.

Explain the root cause of the problem(Maximum 100 words) *

The root cause of the problems in India's project monitoring systems lies in the disconnect between existing, siloed systems and a lack of citizen engagement. This hinders a comprehensive view of project progress, data accuracy, and real-time oversight. While current systems offer valuable functionalities, they haven't fully embraced

Are there existing solutions? If so what are the limitations? *

process for information requests.
Citizen Engagement (MyGov India): Limited features - lacks functionalities for citizen reporting, real-time updates, or data analysis tools. Information access might be limited.

What is the expected outcome when your idea is implemented? *

My proposed system aims to revolutionize government project monitoring in India by:
Bridging the gap: Integrating citizen reporting, real-time data, and transparent expense management.
Empowering citizens: Offering a platform for reporting issues, tracking progress, and fostering participation.

Please give a title to your Idea which will solve the problem (10 words) *

OpenGov

Why do you want to solve this problem? (Maximum 100 words) *

In my opinion, Real-time data and citizen input lead to better project delivery through efficient resource allocation. Ultimately, it empowers citizens to participate, hold authorities accountable, and contribute to their communities.

Explain your idea in a paragraph (100 words) *

Empowering citizen engagement and enhancing government project transparency: This application streamlines project monitoring in India. Citizens report issues and track progress, while authorities gain real-time data and valuable feedback. This fosters trust, optimizes resource allocation, and ultimately, successful project completion.

What is the advantage of the Idea which you are proposing? (Maximum 100 words) *

My system offers a one-stop shop for transparent government project monitoring in India. Citizens report issues, track progress, and see project expenses. Officials gain real-time data, improved communication, and citizen feedback for better project delivery. This fosters trust, efficiency, and successful project completion.

Please let us know who is the customer for your product/solution? *

Citizens, Government Agencies and Contractors

Please upload any files/documents related to the voice of customer survey here: *

Choose File	No file chosen

Estimated Solution time for implementing the Idea? *

12 to 24 months

Estimated cost of the Idea Project? *

500000

Has any member of the team received any Previous recognitions in the past year? *

no

Name of Publication

Details of Publisher

Date of Publication

dd/mm/yyyy

Whether a Prototype has been developed? *

No

Whether any Product Development was attempted if any? *

Yes

Description *

I am currently attempting to create a prototype of the system
